As the auto industry reshapes itself, one company is in the forefront of EMC and RF testing; providing everything you need to meet tomorrow’s challenges. AR has high, medium & low power amps for whole vehicle, subsystem, component and interoperability testing. And AR amps have the performance, dependability and quality to cut any testing job down to size.

Now we’re creating amps with “subampability,” the ability to add power as needed and when additional budget dollars are available. With over three decades in automotive testing, AR is the number one source for everything from amplifiers and power-matched accessories to complete test systems.

Our RF Conducted Immunity test system tests to automotive specs with an unmatched level of reliability, flexibility and ease of use. The PL7004 pulse laser probe is designed specifically for use in measuring radar pulsed electric fields for the 1.2 - 1.4 & 2.7 - 3.1 GHz bands. Everything we do makes testing easier, more accurate and more cost-effective.

AR supplies a multitude of unique RF solutions to companies around the world – including the major automobile manufacturers. Our limitless support network is second to none, and everything we sell is backed by the most comprehensive warranty in the industry.

For any EMC/RF test on the entire vehicle or any of its parts, one company will always reflect well on your business, AR. To learn more, visit www.arworld.us or call us at 215-723-8181.
