

Model BI00401
Bulk Current Injection Probe
1MHz–400MHz

The Model BI00401 is a clamp-on injection probe for testing to ISO11452-4 and SAE J1113-4 Automotive RF Conducted Immunity. The injection probe couples the disturbance onto unshielded cables in the frequency range of 1MHz to 400 MHz.

SPECIFICATIONS

Electrical:

- Frequency Range..... 1MHz–400MHz
- Input Power Rating..... 100 watts up to 30 minutes
- Insertion Loss(See graph)

Mechanical:

- Internal Diameter 40 mm
- External Diameter..... 127 mm
- Height..... 70 mm
- Input Connector Type N
- Required Calibration Fixture..... CF00400
